

Conversion kits

Conversion kits can be retro-fitted in many areas, for example in PU machines or for hydraulic applications. DST conversion kits allow a combination with all major makes of pumps and drive motors. We will evaluate specific applications to produce a functional combination in order to utilize the advantages of “hermatically sealed” and “wear free” in an optimum way.

Performance data

- 1 – 1,200 Nm

Applications

- Petrochemisty
- PU machine manufacturers for the automotive and refrigerator industry
- Laboratory technology

More information on conversion kits can be found in our product catalogue. For detailed information and technical specifications, please contact our employees.
