

Aluminum flow meter VSE EF ecoflow Series

The VSE EF ecoflow has been developed as a response to customer demands for all the performance of the traditional VS flow meter but with a lightweight and more cost effective design, making them ideal for lower pressure hydraulics, lubrication systems, spray coatings and with high temperature options for hotmelt adhesives. The Aluminum flow meter VSE EF ecoflow uses the same gear set as the VS and is based on the same meshing gear principle. The VSE EF ecoflow measures viscous media, however as in-line-device.

Performance data

- Flow range 0.05 up to 150 l/min
- Pressure range up to 2,900 psi
- Temperature range 0 up to 176°F
- Frequency range up to 1,666.7 Hz
- Viscosity range 1 up to 10,000 cSt

Applications

- Oils
- Lubricants
- Printing inks

More information on the product series EF can be found in our product catalogue. For detailed information and technical specifications, please contact our employees.
