

No backlash shaft couplings (Softex® - ES)

Softex® series ES couplings are under initial tension no backlash shaft connections with hubs made of aluminium. The triple simple cardanic couplings are axially pluggable with easy blind assembly, so no time-consuming screwings are necessary. The couplings are maintenance free, due to its simple optical test. Additionally, the gear rings are available in different elastomer hardnesses.

The finish bores are according to ISO limit fit H7 (clamp hub F7), the keyway from $\varnothing 6$ are made according to DIN 6885 P.1-JS9. The couplings are available for all usual shaft dimensions.

More information on no backlash shaft coupling can be found in our product catalogue. For detailed information and technical specifications, please contact our employees.
